

Taconic Colony Management Solutions

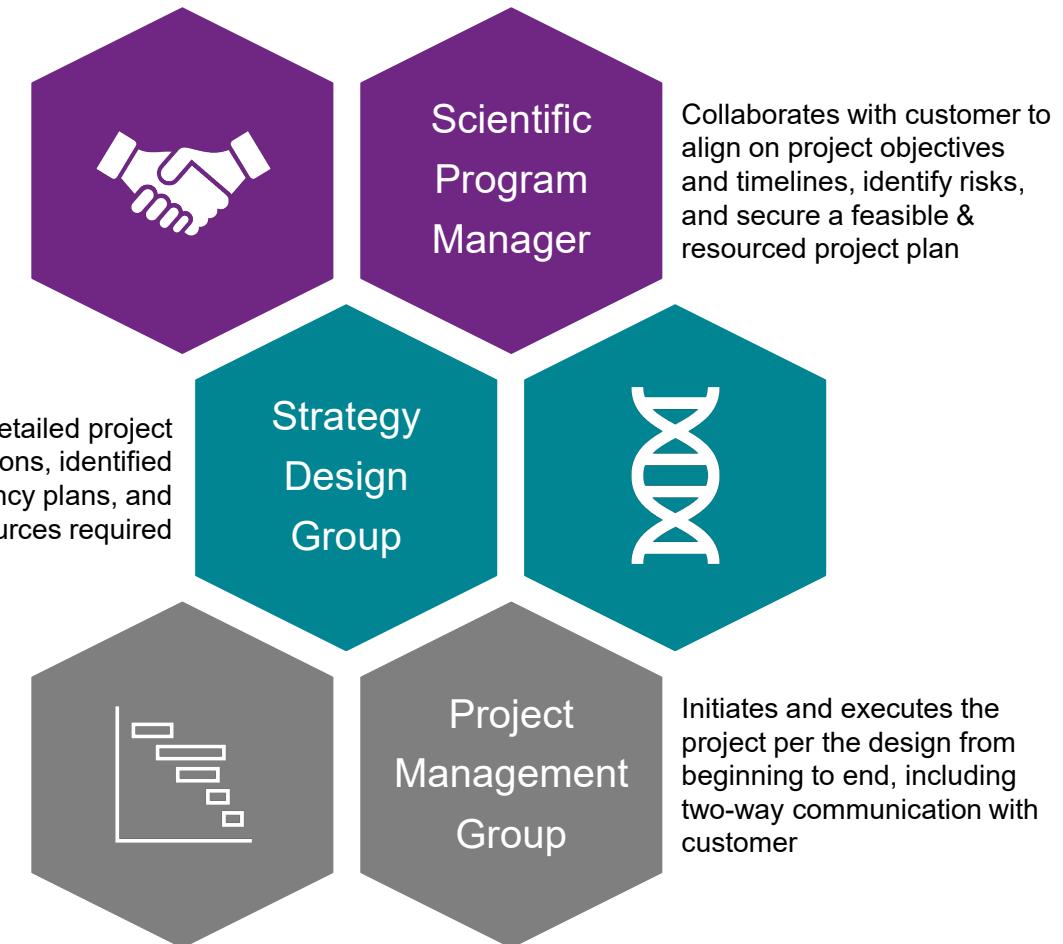

Taconic Scientific Services
Info meeting March 12, 2024

Taconic Scientific Services

Planning & Execution Demands a Team of Experts

- “Plan as you go” approach to colony management leads to a waste of resources
- Our customers entrust us to understand and manage their projects and objectives
- You focus on advancing the science – we focus on advancing your breeding program

The Taconic Difference

Colony Management Solutions

- We do not require our customers to be **experts** in rodent model generation, breeding or management
- Your path starts with **consultation** with a Scientific Program Manager – an expert in the field
- Projects are designed to match **your success criteria**, not ours
- Your project is then assigned to a dedicated Project Manager - they **execute** the design, **proactively manage** risk, timeline, and budget.

COMPREHENSIVE TOOLKIT

- ▶ Flexible Housing & Breeding Options
- ▶ Globally Harmonized Health Standards
- ▶ Embryology Services
- ▶ Cryopreservation & Cryorecovery
- ▶ Genetic & Molecular Analysis
- ▶ Diet Conditioning, Biospecimen Collection/Surgical Modifications

EXPERT-LED PLANNING AND EXECUTION OF CUSTOM SOLUTIONS

- ▶ Upfront Design & Consultation
- ▶ PhD Scientific Program Managers
- ▶ Dedicated Project Managers
- ▶ Operational Support & Subject Matter Experts
- ▶ Unmatched attention to animal welfare through our AWARE™ program
- ▶ 24/7 Access via eTACONIC®

Flexible solutions local to Panum

Colony Management Solutions

- Located only 40 minutes from Panum, Taconic can secure **continuous** animal supply
- **Flexible** housing venue to meet project-specific study requirements from Panum investigators
- Full breadth of services ensures **end-to-end solutions**
- Scientific Program Manager **guides** the process
- More than *just* breeding:

Preconditioning Services

- Custom diet administration
- Aging
- Custom microbiome

Specimen Collection

- Blood, plasma, serum
- Tissue collection and fixation

Animal Identification

- RapID Tags®
- Microchipping
- Tattoo identification

Data Collection

- Clinical observations
- Body weight recording
- Blood glucose monitoring
